Brainstorm & Idea Prioritization Template

Date	10 July 2026
Team ID	SWTID-2026-6119
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run an smooth and productive session

😊 Stay in topic.

💡 Encourage wild ideas.

⏸️ Defer judgment.

👂 Listen to others.

🗣️ Go for volume.

👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

You can select a sticky note and hit the pencil icon to switch to sketch mode to start drawing!

Amar	Yuktesh	Person 3	Person 4
Handwritten: "Handwritten" and "Sketch"			

Person 5	Person 6	Person 7	Person 8

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

Person 4

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Our Brainstorming & Idea Prioritization: Credit Card Approval Prediction System

Ideas Generated

#	Idea	Description
1	Digitized manual rule checklist	Turn the bank's existing manual approval criteria into a digital checklist/form. Quick to implement, but it still depends on fixed thresholds and cannot learn from historical data.
2	ML model tested in Jupyter only	Train and validate classification models purely within a notebook environment. Useful for experimentation and comparison, but offers no interface for a loan officer to actually use.
3	ML model deployed via Flask app	Deploy the best-performing model behind a Flask web interface, so an officer can enter applicant details and instantly receive an approval prediction.
4	Full core-banking system integration	Embed the model directly into the bank's live application-processing systems. The most impactful long-term option, but not achievable given the current data access and project timeline.

Idea Prioritization Matrix (1-5 scale, 5 = best)

Idea	Feasibility	Impact	Time-to-Build	Total
Digitized manual checklist	5	2	5	12
ML model (notebook only)	4	3	4	11
ML model + Flask app	4	5	3	12
Core-banking integration	1	5	1	7

Selected Idea

The team chose to deploy the ML model through a Flask web application as the final direction. This approach offered the best balance of feasibility and impact: it relies on real applicant data rather than static rules, produces a working tool a loan officer can actually use, and fits comfortably within the timeline of the internship — unlike a full core-banking integration.
