Empathize & Discover

Date	10 July 2026
Team ID	SWTID-2026-6119
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Think & Feel

Our Empathy Map: Credit Card Approval Prediction System

Persona 1: Bank Credit Officer

Says	"Each application takes me a good few minutes to work through, and even then I'm not always confident in my own call."
Thinks	"I'd like a reliable, quick way to gauge risk rather than depending on instinct every single time."
Does	Manually checks income documents, employment history, current debts, and repayment track record for every applicant.
Feels	Under pressure from the sheer volume and tight deadlines, and anxious about approving someone risky or turning away someone deserving.
Pain Points	Manual review is repetitive, there's no consistent standard between officers, and mistakes become more likely after reviewing many files in a row.
Gains / Needs	A quick, data-driven suggestion that speeds things up while leaving the final decision in the officer's hands.

Persona 2: Credit Card Applicant

Says	"It's already been three days and I still have no idea whether my card was approved."
Thinks	"Maybe my income wasn't enough, or maybe something else went against me — I really can't tell."
Does	Fills out income proof and personal information online, then keeps checking the status page without seeing any change.
Feels	Restless while waiting, and let down when a rejection shows up with no real explanation.
Pain Points	No way to track progress, no clear sense of how long it will take, and decisions that can seem random.
Gains / Needs	A fast, well-explained decision that stays consistent no matter which officer happens to review the file.
