

Project Demonstration

Team Involvement in Demonstration

Date: 10 July 2026

Team ID: SWTID-2026-6119

Project Name: Credit Card Approval Prediction System

Maximum Marks: 2 Marks

This document maps each team member to the parts of the project they were most involved in building, and the section they will present during the final demonstration - ensuring every presenter can answer questions on their area with first-hand knowledge.

Team Member	Role	Primary Contribution	Demo Section Presented
Naveen Kumar Kayala	Team Member 1 (Easy)	Entity Relationship Diagram, Pre-requisites, Downloading the Dataset, Importing Libraries, Reading the Dataset, Univariate Analysis, Multivariate Analysis	Dataset, Univariate & Multivariate EDA
Manogna Reddy	Team Member 2 (Medium)	Descriptive Analysis, Dropping Duplicate Features, Handling Missing Values, Data Cleaning & Merging, Feature Engineering, Handling Categorical Values, Logistic Regression Model	Data Cleaning, Feature Engineering & Logistic Regression Model
K Akshaya	Team Leader	Work Flow, Random Forest Model, Decision Tree Model, Building HTML Pages, Building the Python Script (Flask), Running the Application, Conclusion	Random Forest, Decision Tree & Final Comparison; Live Application Demo; Architecture, Repository Walkthrough & Conclusion

Collaboration Approach

- All major decisions (model selection criteria, UI design direction, folder structure) were discussed as a team before implementation.
- Work was divided into three levels matched to complexity: dataset setup and EDA (Naveen), data cleaning/feature engineering and the first model (Manogna), and system workflow, the remaining two models, HTML pages, the Flask application, and running/validating the final app (K Akshaya).
- Each member is prepared to answer questions outside their primary section as a backup, since all three reviewed the full repository before submission.
